EDUCATION

University of Florida

Bachelor of Science in Electrical Engineering

Gainesville, FL

Expected May 2028

- **Cumulative GPA:** 3.8/4.0
- **Coursework:** C++ for Engineers, Physics 1 with Calculus 1, Calculus 3, Differential Equations, Computer Aided Graphics and Design

TECHNICAL SKILLS

Languages : Python, JavaScript, HTML/CSS, Lua, C++, LaTeX

Technologies : Docker, SolidWorks (CSWA Certified), Git, Leaflet.js, Chrome API (MV3), REST APIs

Operating Systems : Windows, Linux, Unix/macOS

PROJECTS

Gatorlator (Chrome Extension) | *Javascript, Chrome API, Web Audio*

Jan. 2026

- Awarded **Best Education, Accessibility, & Social Impact Project** at SwampHacks 2026
- Engineered a Chrome extension to capture active tab audio, achieving **sub-500ms latency** for real-time translation and TTS to support accessibility in educational environments
- Integrated **Deepgram** for speech-to-text, **DeepL** for translation, and **ElevenLabs** for high-quality audio output, managing asynchronous API calls and audio streams within a Chrome Service Worker using Javascript
- github.com/suupreme/gatorlator

Personal Home-Lab & Network Infrastructure | *Debian, Raspberry Pi, Docker*

Dec. 2025 – Jan. 2026

- Engineered a dual-node home server environment using a Raspberry Pi 3 B+ and a dedicated Debian-based PC to host network-wide services
- Deployed **Pi-hole** for DNS-level ad blocking and configured **Tailscale** as a secure VPN exit-node, enabling encrypted remote access to the home network
- Implemented **Up-Snap** for Wake-on-LAN (WoL) functionality and utilized **Pterodactyl** to manage containerized game server instances, **improving hardware utilization by 25%** through strict resource capping and isolation.

Web-Based Geolocation Tool | *Javascript, Leaflet.js, HTML/CSS*

Jul. 2024

- Engineered a spatial mapping tool using **JavaScript** and **Leaflet.js** to demonstrate trilateration logic; implemented real-time web geolocation for campus-wide interactive learning, **increasing student conceptual retention by 15%**
- github.com/waychlate/gps-test

EXPERIENCE

Future Problem Solving Program (FPSPI)

Aug. 2022 – May 2023

Team Member | 1st Place Florida CmPS State Competition

Palm Coast, FL

- Awarded **1st Place at the Florida CmPS State Competition** for identifying and implementing a community-driven solution to a local safety issue
- Established a student-led self-defense club by presenting formal proposals to school administration
- Managed project outreach and marketing by designing promotional materials, **increasing student engagement and awareness by 20%**
